## Starfire B.V. Larson

Two ships launch, but only one can come home with the prize - and no one suspects what they'll find when they get out there.

On June 30, 1908, an object fell from the sky, releasing more energy than a thousand Hiroshima bombs. A Siberian forest was flattened, but the strike left no significant crater. The anomaly came to be known as the Tunguska Event, and scientists have never agreed whether it was the largest meteor strike in recorded history - or something else. Alien artifacts have been uncovered since the 1908 event, and a new star drive is discovered. When another larger artifact is detected orbiting Jupiter, both NASA and the Russian Federal Space Agency are determined to beat all rivals to the next treasure trove of alien tech.

#### **Katie Broadnax:**

As a college student exactly feel bored to be able to reading. If their teacher asked them to go to the library or to make summary for some reserve, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading really. Any students feel that looking at is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. Book is very important for you. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Starfire can make you feel more interested to read.
