TCP/IP Illustrated, Vol. 3: TCP for Transactions, HTTP, NNTP, and the UNIX Domain Protocols W. Richard Stevens

Praised by reviewers and practicing TCP/IP programmers alike, the TCP/IP Illustrated series examines the many facets of the TCP/IP protocol suite using a unique and highly-effective visual approach that describes the inner workings of TCP/IP with detail, insight, and clarity. Volume 3 provides detailed coverage of four essential topics with which today's TCP/IP programmers and network administrators must be thoroughly familiar: *T/TCP (TCP for Transactions), an extension to TCP that makes client-server transactions faster, more efficient, and more reliable; *HTTP (Hypertext Transfer Protocol), the foundation for the rapidly expanding World Wide Web; *NNTP (the Network News Transfer Protocol), the basis for the Usenet news system; and *UNIX Domain Protocols, a set of protocols used heavily in UNIX implementations. As in the previous two volumes, the book is filled with examples and implementation details within the 4.4BSD-Lite networking code. The TCP/IP Illustrated series provides a complete picture of the protocol suite that drives the Internet, and gives programmers, system administrators, and serious users the information, understanding, and skills they need to remain at the forefront of networking technology. 0201634953B04062001

From reader reviews:

Gary Lopez:

Book is usually written, printed, or created for everything. You can realize everything you want by a reserve. Book has a different type. To be sure that book is important point to bring us around the world. Next to that you can your reading skill was fluently. A e-book TCP/IP Illustrated, Vol. 3: TCP for Transactions, HTTP, NNTP, and the UNIX Domain Protocols will make you to become smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that will open or reading the book make you bored. It is far from make you fun. Why they can be thought like that? Have you searching for best book or appropriate book with you?

Nakia Schultz:

Spent a free time and energy to be fun activity to do! A lot of people spent their down time with their family, or their own friends. Usually they carrying out activity like watching television, gonna beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your current free time/ holiday? Could possibly be reading a book can be option to fill your free time/ holiday. The first thing you will ask may be what kinds of reserve that you should read. If you want to try look for book, may be the guide untitled TCP/IP Illustrated, Vol. 3: TCP for Transactions, HTTP, NNTP, and the UNIX Domain Protocols can be great book to read. May be it can be best activity to you.

Lena Robertson:

Beside this TCP/IP Illustrated, Vol. 3: TCP for Transactions, HTTP, NNTP, and the UNIX Domain Protocols in your phone, it can give you a way to get nearer to the new knowledge or information. The information and the knowledge you can got here is fresh through the oven so don't possibly be worry if you feel like an older people live in narrow small town. It is good thing to have TCP/IP Illustrated, Vol. 3: TCP for Transactions, HTTP, NNTP, and the UNIX Domain Protocols because this book offers to your account readable information. Do you at times have book but you rarely get what it's all about. Oh come on, that will not happen if you have this within your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss it? Find this book as well as read it from right now!

Roxie Gregory:

As we know that book is essential thing to add our know-how for everything. By a book we can know everything we really wish for. A book is a list of written, printed, illustrated or blank sheet. Every year has been exactly added. This book TCP/IP Illustrated, Vol. 3: TCP for Transactions, HTTP, NNTP, and the UNIX Domain Protocols was filled concerning science. Spend your free time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading some sort of book. If you know how big benefit of a book, you can sense enjoy to read a guide. In the modern era like today, many ways to get book that you wanted.
