A First Course in Machine Learning (Chapman & Hall/Crc Machine Learning & Pattern Recognition)

Simon Rogers, Mark Girolami

A First Course in Machine Learning (Chapman & Hall/Crc Machine Learning & Pattern Recognition) Simon Rogers, Mark Girolami

A First Course in Machine Learning covers the core mathematical and statistical techniques needed to understand some of the most popular machine learning algorithms. The algorithms presented span the main problem areas within machine learning: classification, clustering and projection. The text gives detailed descriptions and derivations for a small number of algorithms rather than cover many algorithms in less detail.

Referenced throughout the text and available on a supporting website (<http://bit.ly/firstcourseml>), an extensive collection of MATLAB[®]/Octave scripts enables students to recreate plots that appear in the book and investigate changing model specifications and parameter values. By experimenting with the various algorithms and concepts, students see how an abstract set of equations can be used to solve real problems.

Requiring minimal mathematical prerequisites, the classroom-tested material in this text offers a concise, accessible introduction to machine learning. It provides students with the knowledge and confidence to explore the machine learning literature and research specific methods in more detail.

From reader reviews:

Lewis Wood:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite reserve and reading a guide. Beside you can solve your problem; you can add your knowledge by the book entitled A First Course in Machine Learning (Chapman & Hall/Crc Machine Learning & Pattern Recognition). Try to the actual book A First Course in Machine Learning (Chapman & Hall/Crc Machine Learning & Pattern Recognition) as your pal. It means that it can to get your friend when you sense alone and beside associated with course make you smarter than in the past. Yeah, it is very fortunated to suit your needs. The book makes you much more confidence because you can know every thing by the book. So , we should make new experience and also knowledge with this book.

Ann Wren:

In this 21st one hundred year, people become competitive in each way. By being competitive today, people have do something to make these individuals survives, being in the middle of typically the crowded place and notice through surrounding. One thing that oftentimes many people have underestimated this for a while is reading. That's why, by reading a publication your ability to survive increase then having chance to remain than other is high. For yourself who want to start reading any book, we give you that A First Course in Machine Learning (Chapman & Hall/Crc Machine Learning & Pattern Recognition) book as beginning and daily reading guide. Why, because this book is greater than just a book.

Carolyn Foley:

Nowadays reading books are more than want or need but also be a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the rest of the information inside the book that improve your knowledge and information. The details you get based on what kind of e-book you read, if you want send more knowledge just go with training books but if you want really feel happy read one along with theme for entertaining such as comic or novel. The particular A First Course in Machine Learning (Chapman & Hall/Crc Machine Learning & Pattern Recognition) is kind of book which is giving the reader unpredictable experience.

James Longo:

Reading a guide make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is prepared or printed or outlined from each source this filled update of news. In this particular modern era like right now, many ways to get information are available for anyone. From media social just like newspaper, magazines, science publication, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just seeking the A First Course in Machine Learning (Chapman & Hall/Crc Machine Learning & Pattern Recognition) when you needed it?
