## Remote Sensing of Drought: Innovative Monitoring Approaches (Drought and Water Crises)

**Remote Sensing of Drought: Innovative Monitoring Approaches** presents emerging remote sensing-based tools and techniques that can be applied to operational drought monitoring and early warning around the world. The first book to focus on remote sensing and drought monitoring, it brings together a wealth of information that has been scattered throughout the literature and across many disciplines. Featuring contributions by leading scientists, it assembles a cross-section of globally applicable techniques that are currently operational or have potential to be operational in the near future.

The book explores a range of applications for monitoring four critical components of the hydrological cycle related to drought: vegetation health, evapotranspiration, soil moisture and groundwater, and precipitation. These applications use remotely sensed optical, thermal, microwave, radar, and gravity data from instruments such as AMSR-E, GOES, GRACE, MERIS, MODIS, and Landsat and implement several advanced modeling and data assimilation techniques. Examples show how to integrate this information into routine drought products. The book also examines the role of satellite remote sensing within traditional drought monitoring, as well as current challenges and future prospects.

Improving drought monitoring is becoming increasingly important in addressing a wide range of societal issues, from food security and water scarcity to human health, ecosystem services, and energy production. This unique book surveys innovative remote sensing approaches to provide you with new perspectives on large-area drought monitoring and early warning.

### **From reader reviews:**

#### **Michelle Mills:**

The e-book untitled Remote Sensing of Drought: Innovative Monitoring Approaches (Drought and Water Crises) is the guide that recommended to you to read. You can see the quality of the book content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of investigation when write the book, to ensure the information that they share to your account is absolutely accurate. You also might get the e-book of Remote Sensing of Drought: Innovative Monitoring Approaches (Drought and Water Crises) from the publisher to make you a lot more enjoy free time.

#### **Cynthia Briscoe:**

A lot of people always spent their own free time to vacation or maybe go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent they free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that is look different you can read the book. It is really fun for you personally. If you enjoy the book which you read you can spent 24 hours a day to reading a e-book. The book Remote Sensing of Drought: Innovative Monitoring Approaches (Drought and Water Crises) it doesn't matter what good to read. There are a lot of people who recommended this book. These people were enjoying reading this book. Should you did not have enough space to create this book you can buy the particular e-book. You can m0ore quickly to read this book from your smart phone. The price is not to fund but this book features high quality.

#### **Cheryl Waller:**

The reason why? Because this Remote Sensing of Drought: Innovative Monitoring Approaches (Drought and Water Crises) is an unordinary book that the inside of the e-book waiting for you to snap this but latter it will surprise you with the secret it inside. Reading this book beside it was fantastic author who write the book in such remarkable way makes the content on the inside easier to understand, entertaining way but still convey the meaning completely. So , it is good for you for not hesitating having this any more or you going to regret it. This unique book will give you a lot of gains than the other book have got such as help improving your talent and your critical thinking approach. So , still want to delay having that book? If I had been you I will go to the guide store hurriedly.

#### **Dwight Richardson:**

Reading a book for being new life style in this 12 months; every people loves to read a book. When you learn a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics,

and also soon. The Remote Sensing of Drought: Innovative Monitoring Approaches (Drought and Water Crises) provide you with new experience in looking at a book.
