History of Psychology: The Making of a Science (Explore Our New Psychology 1st Editions) Edward P. Kardas

HISTORY OF PSYCHOLOGY: THE MAKING OF A SCIENCE illustrates historical relationships between psychology's past and present. It traces the relationship of psychology to other disciplines (philosophy, computational science, biology, and social science) by using a "border" metaphor--that is, examining the areas in and out of which psychology has moved and continues to move. As a result, you'll gain a fuller, more realistic understanding of psychology as a living discipline that is continually evolving.
