Driving Demand for Broadband Networks and Services (Signals and Communication Technology)

Raul L. Katz, Taylor A. Berry

This book examines the reasons why various groups around the world choose not to adopt broadband services and evaluates strategies to stimulate the demand that will lead to increased broadband use. It introduces readers to the benefits of higher adoption rates while examining the progress that developed and emerging countries have made in stimulating broadband demand. By relying on concepts such as a supply and demand gap, broadband price elasticity, and demand promotion, this book explains differences between the fixed and mobile broadband demand gap, introducing the notions of substitution and complementarity between both platforms. Building on these concepts, 'Driving Demand for Broadband Networks and Services' offers a set of best practices and recommendations aimed at promoting broadband demand.

The broadband demand gap is defined as individuals and households that could buy a broadband subscription because they live in areas served by telecommunications carriers but do not do so because of either economic, limited awareness, or lack of digital literacy reasons. This grouping represents a range from 30% of the population in the US, 40% in Germany, and over 80% in most emerging countries. Research indicates that broadband usage is critical for social development, economic performance, and overall welfare and so it behoves governments to encourage demand.

This study is the first of its kind to address the demand side of broadband diffusion, incorporating an economic analysis while offering real world examples of policies and initiatives that have successfully spurred demand in developed and emerging markets alike. This book is intended for policy makers, managers of telecommunications and other technology companies, as well as academics and graduate students in the areas of public policy, economic development, and technology management.

This book is an eye-opener for policy makers. Traditionally ICT policy has focused on the supply side. Katz and Berry develop great ideas to leapfrog Internet penetration from the demand side, where the value of the Internet is. - Diego Molano Vega, Minister of Information Technologies and Communications of Colombia

This book is an instant classic. It brilliantly and convincingly lays out the case why dealing with inadequate internet penetration has moved from the creation of supply to one of encouraging demand. It provides an information-rich and well-written presentation of the factors holding back people from becoming users, and offers a hugely valuable survey of the various programs around the world to make the broadband internet truly useful to people everywhere. It is the kind of book writers in this field will use constantly. - Eli Noam, Professor of Finance and Economics, Columbia Business School

This new study by Katz and Berry examines the rationale for national broadband plans and the evidence for their success in driving demand. It presents the latest data on broadband in a range of case study countries, and provides best practice advice for policy-makers and development practitioners. - Dr Tim Kelly, Lead ICT Policy Specialist, World Bank

From reader reviews:

Forest Nelson:

In this 21st hundred years, people become competitive in every way. By being competitive currently, people have do something to make these individuals survives, being in the middle of the crowded place and notice by simply surrounding. One thing that sometimes many people have underestimated that for a while is reading. Yep, by reading a publication your ability to survive increase then having chance to stand up than other is high. For you who want to start reading a book, we give you this Driving Demand for Broadband Networks and Services (Signals and Communication Technology) book as basic and daily reading e-book. Why, because this book is usually more than just a book.

Bradley Simpson:

Hey guys, do you desires to finds a new book to see? May be the book with the name Driving Demand for Broadband Networks and Services (Signals and Communication Technology) suitable to you? The book was written by famous writer in this era. The actual book untitled Driving Demand for Broadband Networks and Services (Signals and Communication Technology)is a single of several books this everyone read now. That book was inspired many people in the world. When you read this e-book you will enter the new way of measuring that you ever know previous to. The author explained their plan in the simple way, so all of people can easily to be aware of the core of this guide. This book will give you a lots of information about this world now. To help you see the represented of the world on this book.

Dianne Tripp:

In this age globalization it is important to someone to get information. The information will make someone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Typically the book that recommended for you is Driving Demand for Broadband Networks and Services (Signals and Communication Technology) this book consist a lot of the information in the condition of this world now. This particular book was represented how does the world has grown up. The terminology styles that writer require to explain it is easy to understand. The actual writer made some study when he makes this book. That is why this book appropriate all of you.

Desiree Grajeda:

Don't be worry in case you are afraid that this book will certainly filled the space in your house, you might have it in e-book means, more simple and reachable. This Driving Demand for Broadband Networks and Services (Signals and Communication Technology) can give you a lot of pals because by you considering this one book you have factor that they don't and make you actually more like an interesting person. This particular book can be one of a step for you to get success. This guide offer you information that maybe your

friend doesn't recognize, by knowing more than various other make you to be great people. So , why hesitate? Let us have Driving Demand for Broadband Networks and Services (Signals and Communication Technology).
