Longitudinal Categorical Data Analysis (Springer Series in Statistics)

Brajendra C. Sutradhar

Longitudinal Categorical Data Analysis (Springer Series in Statistics) Brajendra C. Sutradhar

This is the first book in longitudinal categorical data analysis with parametric correlation models developed based on dynamic relationships among repeated categorical responses. This book is a natural generalization of the longitudinal binary data analysis to the multinomial data setup with more than two categories. Thus, unlike the existing books on cross-sectional categorical data analysis using log linear models, this book uses multinomial probability models both in cross-sectional and longitudinal setups. A theoretical foundation is provided for the analysis of univariate multinomial responses, by developing models systematically for the cases with no covariates as well as categorical covariates, both in cross-sectional and longitudinal setups. In the longitudinal setup, both stationary and non-stationary covariates are considered. These models have also been extended to the bivariate multinomial setup along with suitable covariates. For the inferences, the book uses the generalized quasi-likelihood as well as the exact likelihood approaches.

The book is technically rigorous, and, it also presents illustrations of the statistical analysis of various real life data involving univariate multinomial responses both in cross-sectional and longitudinal setups. This book is written mainly for the graduate students and researchers in statistics and social sciences, among other applied statistics research areas. However, the rest of the book, specifically the chapters from 1 to 3, may also be used for a senior undergraduate course in statistics.

From reader reviews:

Mary Marshall:

Information is provisions for folks to get better life, information today can get by anyone with everywhere. The information can be a knowledge or any news even an issue. What people must be consider any time those information which is inside former life are hard to be find than now's taking seriously which one is suitable to believe or which one the resource are convinced. If you obtain the unstable resource then you get it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take Longitudinal Categorical Data Analysis (Springer Series in Statistics) as your daily resource information.

Brian Crafton:

Often the book Longitudinal Categorical Data Analysis (Springer Series in Statistics) will bring you to the new experience of reading the book. The author style to explain the idea is very unique. In the event you try to find new book you just read, this book very suited to you. The book Longitudinal Categorical Data Analysis (Springer Series in Statistics) is much recommended to you you just read. You can also get the e-book from your official web site, so you can more readily to read the book.

Cynthia Miller:

The book untitled Longitudinal Categorical Data Analysis (Springer Series in Statistics) contain a lot of information on that. The writer explains your ex idea with easy approach. The language is very simple to implement all the people, so do certainly not worry, you can easy to read the idea. The book was published by famous author. The author will bring you in the new period of time of literary works. You can actually read this book because you can continue reading your smart phone, or gadget, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site along with order it. Have a nice read.

Paul Howell:

You may spend your free time to see this book this e-book. This Longitudinal Categorical Data Analysis (Springer Series in Statistics) is simple to create you can read it in the area, in the beach, train in addition to soon. If you did not include much space to bring typically the printed book, you can buy the e-book. It is make you quicker to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.
