Geoffrey Redmond

The Hormonally Vulnerable Woman: Relief at last for PMS, mood swings, fatigue, hair loss, adult acne, unwanted hair, female pain, migraine, weight ... the problems of perimenopause and menopause!

Geoffrey Redmond

According to Geoffrey Redmond, M.D., a majority of the 42 million American women between the ages of thirty-five and fifty-five suffer from vulnerability to their own hormones. Appearance, emotions -- and even sex drive -- may be affected. Symptoms include thinning hair, persistent acne, mood swings, low energy, loss of pleasure in sex, weight gain, irregular periods, and pain. While the media has emphasized the problems of menopause, Dr. Redmond explains that all too many women experience hormonal miseries even in their thirties. Lab tests are often normal because the problem is not the hormones themselves but how a woman's body reacts to them. Healthy, active women suddenly find that once quiescent hormones have taken over control of their lives. Because their problems are often dismissed as trivial, women who are hormonally vulnerable are frequently thwarted in their quest for help. Too often they are brushed off with remarks such as, "Your tests are normal; there's nothing wrong with you." This is tragic because, as Dr. Redmond demonstrates, hormonal balance can nearly always be restored with the treatments he details, which include individualized use of prescription medications, herbal supplements, lifestyle changes, and even spiritual practices. Many women have heard that testosterone can help sex drive, but most have not been warned about the damage that careless testosterone therapy can cause on skin and hair.

In this book, Dr. Redmond, an internationally recognized authority on testosterone in women, explains the only safe ways to use testosterone. With informative sidebars, quizzes, and personal stories of women who have overcome hormone vulnerability, this helpful book will empower you to find treatments for your hormone problems that are tailored to fit your own body, biochemistry, symptoms, and lifestyle.
