Applying Generalized Linear Models (Springer Texts in Statistics)

James K. Lindsey

Applying Generalized Linear Models (Springer Texts in Statistics) James K. Lindsey
This book describes how generalised linear modelling procedures can be used in many different fields, without becoming entangled in problems of statistical inference. The author shows the unity of many of the commonly used models and provides readers with a taste of many different areas, such as survival models, time series, and spatial analysis, and of their unity. As such, this book will appeal to applied statisticians and to scientists having a basic grounding in modern statistics. With many exercises at the end of each chapter, it will equally constitute an excellent text for teaching applied statistics students and non- statistics majors. The reader is assumed to have knowledge of basic statistical principles, whether from a Bayesian, frequentist, or direct likelihood point of view, being familiar at least with the analysis of the simpler normal linear models, regression and ANOVA.

From reader reviews:

Wendy Brame:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each publication has different aim or even goal; it means that book has different type. Some people truly feel enjoy to spend their time for you to read a book. They can be reading whatever they get because their hobby is actually reading a book. What about the person who don't like studying a book? Sometime, person feel need book once they found difficult problem or exercise. Well, probably you should have this Applying Generalized Linear Models (Springer Texts in Statistics).

Karen Lawless:

In this 21st millennium, people become competitive in each way. By being competitive now, people have do something to make them survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated the item for a while is reading. That's why, by reading a e-book your ability to survive improve then having chance to stay than other is high. For you personally who want to start reading some sort of book, we give you this particular Applying Generalized Linear Models (Springer Texts in Statistics) book as beginner and daily reading reserve. Why, because this book is more than just a book.

Donald Pate:

As people who live in often the modest era should be up-date about what going on or info even knowledge to make these individuals keep up with the era that is always change and move forward. Some of you maybe can update themselves by examining books. It is a good choice in your case but the problems coming to a person is you don't know what kind you should start with. This Applying Generalized Linear Models (Springer Texts in Statistics) is our recommendation so you keep up with the world. Why, because this book serves what you want and want in this era.

Ronny Baird:

With this era which is the greater individual or who has ability to do something more are more precious than other. Do you want to become considered one of it? It is just simple strategy to have that. What you are related is just spending your time very little but quite enough to enjoy a look at some books. Among the books in the top collection in your reading list is Applying Generalized Linear Models (Springer Texts in Statistics). This book and that is qualified as The Hungry Hillsides can get you closer in becoming precious person. By looking up and review this e-book you can get many advantages.
