Pathophysiology: Concepts and Applications for Health Care Professionals

Thomas Nowak, A. Gordon Handford

Pathophysiology: Concepts and Applications for Health Care Professionals Thomas Nowak, A. Gordon Handford

The traditional pathophysiology book is written for the medical student. Nursing and allied health students (usually at the sophomore level) have simply had to make-do with cumbersome (1500 to 1600 page) books, that assume considerably more science background than the typical allied health student has acquired. The Nowak book is not only **brief** (at 700 pages) but is organized in a manner that brings the principles of pathophysiology to the forefront. The authors focus on the relatively few **patterns of disease**, rather than asking students to memorize extensive catalogs of specific diseases. This **conceptual approach** is more suited to the allied health student than the disease centered approach featured in the major competitors.
