Analog Optical Links: Theory and Practice (Cambridge Studies in Modern Optics)

Charles H. Cox III

Analog Optical Links: Theory and Practice (Cambridge Studies in Modern Optics) Charles H. Cox III
Unlike books that focus on the devices used in links, such as lasers and photodiodes, among others, this text focuses on the next level. It covers the collection of devices that form a link, how the individual device performance affects the link performance, or the reverse. Analog links are used for the distribution of cable TV signals, and in conveying the signals to and from antennas (so called antenna remoting). The design of analog links differs significantly from digital links which are primarily used in telecommunications.
