Butterflies

Ron Orenstein

Butterflies Ron Orenstein

Here are some of the most colorful, spectacular and sometimes weird examples of the world's butterflies and moths. From the common swallowtail to the iridescent blue morpho, Thomas Marent's stunning photographs provide a close-up view of the remarkable family of insects known as Lepidoptera. The macro photography complements the enlightening text written by zoologist Ronald Orenstein, who explains the scientific curiosities of these amazing insects. He makes clear how to differentiate between butterflies and moths; how caterpillars camouflage themselves; and how their feeding strategies and evolutionary adaptations help them prevail in the wild.

Examples include such seldom-seen species as the green dragontail (Indonesia), Mexican kite-swallowtail (Costa Rica), the alpine black swallowtail (China) and European sulphurs. Among the many anatomical characteristics profiled are the purpose and differences between butterfly and moth antennae (smell, communication and feel); how some butterflies are amazing mimics, appearing to the untrained eye as nectar-feeding hummingbirds; and how the patterns on their wings, depending on the species, may be spots that make the insects look like larger critters to their predators.

Butterflies has seven sections which provide comprehensive coverage of Lepidoptera. They are:

1. Introduction to Butterflies includes What are butterflies?; Color Patterns; Courtship; Migration; and Climate Change
2. Butterfly Diversity includes Swallowtails; Skippers; Whites, Sulphurs and Yellows; Milkweed Butterflies; Fritillaries; Emperors; Gossamer-winged Butterflies; Metalmarks and more
3. Butterfly Wings covers Flight; Color; Tails and Ornaments; Eyespots and more
4. Butterfly Life History covers Mating; Eggs; Caterpillars; Metamorphosis and more
5. What Butterflies Eat includes Feeding Apparatus; Flowers; Rotting Fruit; Drinking; Puddling and more
6. Butterflies in their Environment covers Predators; Camouflage; Mimicry; Overwintering and more
7. Myriads of Moths includes Day-Flying Moths; Silks; Giants; Mimicry; Wing Pattern; Defense and more.

Butterflies brings to abundant life the unfathomable beauty and variety of butterflies and moths.

From reader reviews:

Steven Page:

Spent a free time and energy to be fun activity to accomplish! A lot of people spent their free time with their family, or all their friends. Usually they doing activity like watching television, about to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? Can be reading a book could be option to fill your cost-free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to test look for book, may be the reserve untitled Butterflies can be great book to read. May be it could be best activity to you.

Kimberly Thibault:

You may spend your free time to study this book this reserve. This Butterflies is simple to bring you can read it in the area, in the beach, train as well as soon. If you did not possess much space to bring the printed book, you can buy the e-book. It is make you easier to read it. You can save typically the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Michael Martin:

As we know that book is very important thing to add our knowledge for everything. By a e-book we can know everything we want. A book is a list of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This guide Butterflies was filled about science. Spend your free time to add your knowledge about your scientific research competence. Some people has several feel when they reading some sort of book. If you know how big benefit from a book, you can experience enjoy to read a publication. In the modern era like currently, many ways to get book which you wanted.

Lorenzo Maskell:

As a university student exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some publication, they are complained. Just very little students that has reading's spirit or real their passion. They just do what the professor want, like asked to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Butterflies can make you really feel more interested to read.
