Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series)

H. R. Everett

Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) H. R. Everett

Military drones have recently been hailed as a revolutionary new technology that will forever change the conduct of war. And yet the United States and other countries have been deploying such unmanned military systems for more than a century. Written by a renowned authority in the field, this book documents the forgotten legacy of these pioneering efforts, offering the first comprehensive historical and technical accounting of unmanned air, land, sea, and underwater systems. Focusing on examples introduced during the two world wars, H. R. Everett meticulously traces their development from the mid-nineteenth century to the early Cold War. A pioneering Navy roboticist, Everett not only describes these systems in detail but also reverse-engineers the designs in order to explain how they operated in real-world conditions of the time. More than 500 illustrations -- photographs, drawings, and plans, many of them never before published -- accompany the text.

Everett covers the evolution of early wire-guided submersibles, tracing the development of power, propulsion, communication, and control; radio-controlled surface craft, deployed by both Germany and Great Britain in World War I; radio-controlled submersibles; radio-controlled aircraft, including the TDR-1 assault drone project in World War II -- which laid the groundwork for subsequent highly classified drone programs; and radio-controlled ground vehicles, including the Wehrmacht's Goliath and Borgwald demolition carriers.

From reader reviews:

Maria Carlin:

The book Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) can give more knowledge and information about everything you want. So just why must we leave the good thing like a book Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series)? Several of you have a different opinion about book. But one aim this book can give many details for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or info that you take for that, you can give for each other; you could share all of these. Book Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) has simple shape but you know: it has great and big function for you. You can appearance the enormous world by start and read a book. So it is very wonderful.

Donna Bledsoe:

In this 21st century, people become competitive in each and every way. By being competitive right now, people have do something to make these individuals survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. That's why, by reading a e-book your ability to survive improve then having chance to stay than other is high. To suit your needs who want to start reading any book, we give you that Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) book as beginning and daily reading guide. Why, because this book is usually more than just a book.

Mike Hart:

This Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) is brand new way for you who has curiosity to look for some information mainly because it relief your hunger of information. Getting deeper you onto it getting knowledge more you know otherwise you who still having little digest in reading this Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) can be the light food for yourself because the information inside this particular book is easy to get by means of anyone. These books build itself in the form that is reachable by anyone, sure I mean in the e-book form. People who think that in reserve form make them feel sleepy even dizzy this book is the answer. So you cannot find any in reading a book especially this one. You can find actually looking for. It should be here for a person. So , don't miss this! Just read this e-book variety for your better life and knowledge.

John Parish:

You can obtain this Unmanned Systems of World Wars I and II (Intelligent Robotics and Autonomous Agents series) by check out the bookstore or Mall. Simply viewing or reviewing it could to be your solve difficulty if you get difficulties for the knowledge. Kinds of this e-book are various. Not only through written

or printed but in addition can you enjoy this book by e-book. In the modern era similar to now, you just looking from your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your guide. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose suitable ways for you.
